

BIPP
BUYER DRIVEN MARKET PLACE
FOR
E-SOURCING & E-PROCUREMENT
IN
LIFE SCIENCES

FROM 'WEBSHOP HOPPING' TO SEARCHING YOUR ONLINE 'LIBRARY OF E-CATALOGUES': HOW ?

Still creating your article list manually from printed catalogues or webshops?

Search & order each webshop separately?

- > login/password per webshop or punch-out
- > spread out, non uniform and incomplete ordering history ? Expired prices in favorite lists ?
- > connecting your ERP-system with 'EACH' of these webshops individually?!

Integrating & maintaining your online supplier catalogues connections yourself and one by one ?!

New integrations to be created every 4 year caused by 'public procurement' obligations, leaving behind the existing connections ? (what about the collaboration with suppliers when integration work is left behind after 4 years ?!)

Alternative ?

- All desired webshopdata provided in one uniform online searchable & personalized multi-catalogue library
- Obtain your multi-catalogue library data simultaneously through only 1 integration with your backstage ?
- Additionnally: Functionalities to support Life Sciences specific needs within the purchasing process & workflow
- Switch easily to new suppliers (and back) in case of public procurement obligations

BIPP = integrating ALL your desired suppliers
